Bachelor of Science in Mathematics

MODULE HANDBOOK

Module name:	Computer Application
Module level,if applicable:	Undergraduate
Code:	MAT6316
Sub-heading,if applicable:	-
Classes,if applicable:	-
Semester:	3 rd
Module coordinator:	Sahid, M.Sc
Lecturer(s):	1. Sahid, M.Sc 2. Dr. Sri Andayani
Language:	Bahasa Indonesia
Classification within the curriculum:	Compulsory course
Teaching format / class hours per week during the semester:	150 minutes lectures and 180 minutes structured activities per week.
Workload:	Total workload is 136 hours per semester which consists of 150 minutes lectures, 180 minutes structured activities, and 180 minutes self-study per week for 16 weeks.
Creditpoints:	3
Prerequisites course(s):	Information and Communication Technology (MAT6310)
Course outcomes:	After taking this course the students have ability to: CO1. Describe the features of a mathematical application software, both commercial and free CO2. Using mathematical application software to perform

	<p>mathematical calculations, both arithmetic operations and calculation of mathematical functions from simple to complex</p> <p>CO3. Use the math application software to draw various graphs of mathematical functions in two dimensions (2D)</p> <p>CO4. Use the math application software to draw various graphs of mathematical functions in three dimensions (3D)</p> <p>CO5. Use mathematical application software to perform algebraic calculations</p> <p>CO6. Use the math application software to do calculus calculations</p> <p>CO7. Using the math application software for construct geometric objects</p> <p>CO8. Using LaTeX software to write mathematical expressions, from simple to complex mathematical expressions</p> <p>CO9. Using LaTeX software to produce mathematical documents</p>
<p>Content:</p>	<p>This course is about introduction of mathematical software - both commercial and free, comparison of features of mathematical software, and the use of several free mathematical software to solve mathematical problems and processing mathematical documents.</p> <p>In this course students learn to use some free math software that has the ability to solve mathematical problems in an analytical (exact) or numerical manner and for processing mathematical documents, for example Euler Maths Toolbox (EMT), Octave, Maxima, Scilab, GeoGebra, and LaTeX software.</p> <p>The use of free software is based on the fact that the Mathematics Education Department of UNY does not have commercial mathematical software that is legally licensed (the process of procuring such software is not easy) and the fact that free mathematical software has the ability is not inferior to commercial software.</p>
<p>Study/exam achievements:</p>	<p>Attitude assessment is carried out at each meeting by observation and / or self-assessment techniques using the</p>

	<p>assumption that basically every student has a good attitude. The student is given a value of very good or not good attitude if they show it significantly compared to other students in general. The result of attitude assessment is not a component of the final grades, but as one of the requirements to pass the course. Students will pass from this course if at least have a good attitude.</p> <p>The final mark will be weight as follow:</p> <table border="1" data-bbox="610 548 1432 888"> <thead> <tr> <th>No</th> <th>CO</th> <th>Assessment Object</th> <th>Assessment Technique</th> <th>Weight</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>CO 1 sd CO 9</td> <td>Student's answer</td> <td>Verbal Quiz</td> <td>20%</td> </tr> <tr> <td>2</td> <td>CO1 - CO7</td> <td>Student's work and answer</td> <td>Written test</td> <td>30%</td> </tr> <tr> <td>3</td> <td>CO8 - CO9</td> <td>Student's work</td> <td>Final project course</td> <td>50%</td> </tr> <tr> <td colspan="4" style="text-align: right;">Total</td> <td>100%</td> </tr> </tbody> </table>	No	CO	Assessment Object	Assessment Technique	Weight	1	CO 1 sd CO 9	Student's answer	Verbal Quiz	20%	2	CO1 - CO7	Student's work and answer	Written test	30%	3	CO8 - CO9	Student's work	Final project course	50%	Total				100%
No	CO	Assessment Object	Assessment Technique	Weight																						
1	CO 1 sd CO 9	Student's answer	Verbal Quiz	20%																						
2	CO1 - CO7	Student's work and answer	Written test	30%																						
3	CO8 - CO9	Student's work	Final project course	50%																						
Total				100%
