Bachelor of Science in Mathematics

MODULE HANDBOOK

Module name:	Probability Theory
Module level,if applicable:	Undergraduate
Code:	MAT6315
Sub-heading,if applicable:	-
Classes,if applicable:	-
Semester:	3 rd
Module coordinator:	Dra. Mathilda Susanti, M.Si.
Lecturer(s):	1. Dra. Mathilda Susanti, M.Si. 2. Rosita Kusumawati, M.Sc 3. Syarifah Inayati, S.Pd., M.Sc.
Language:	Bahasa Indonesia
Classification within the curriculum:	Compulsory course
Teaching format/class hours perweek during the semester:	150 minutes lectures and 180 minutes structured activities per week.
Workload:	Total workload is 136 hours per semester,which consists of 150 minutes lectures, 180 minutes structured activities, and 180 minutes self-study per week for 16 weeks.
Creditpoints:	3
Prerequisites course(s):	Statistics (MKU 6201)
Course outcomes	After taking this course, the students have the ability to: CO1. Demonstrate respect for the views, opinions or original findings of others. CO2. Demonstrate the ability to think critically, creatively,

	<p>innovatively, and systematically in the development of science and technology, both independently and in groups.</p> <p>CO3. Demonstrate the ability to convey mathematical ideas in writing and verbally based on values of honesty.</p> <p>CO4. Explain concepts in probability theory.</p> <p>CO5. Prove the theorems related to probability.</p> <p>CO6. Solve problems using concepts in probability theory.</p>																												
Content:	<p>The course is more focused on probability concepts. The materials of probability theory are combinatorial methods, probability, random variables and their distributions, joint distributions, properties of random variables, and functions of random variables.</p>																												
Study/exam achievements:	<p>CO1: Attitude assessment is carried out at each meeting by observation and / or self-assessment techniques using the assumption that basically every student has a good attitude. The student is given a value of very good or not good attitude if they show it significantly compared to other students in general. The result of attitude assessment is not a component of the final grades, but as one of the requirements to pass the course. Students will pass from this course if at least have a good attitude.</p> <p>The final mark will be weight as follow:</p> <table border="1" data-bbox="621 1417 1414 1858"> <thead> <tr> <th>No</th> <th>CO</th> <th>Assessment Object</th> <th>Assessment Technique</th> <th>Weight</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>CO2, CO3</td> <td>Presentation</td> <td>Observation</td> <td>10%</td> </tr> <tr> <td rowspan="5">2</td> <td rowspan="5">CO4,CO5, CO6</td> <td>a. Individual Assignment</td> <td rowspan="5">Written test</td> <td>10%</td> </tr> <tr> <td>b. Group Assignment</td> <td>10%</td> </tr> <tr> <td>c. Quiz</td> <td>20%</td> </tr> <tr> <td>d. Mid-Term Examination</td> <td>25%</td> </tr> <tr> <td>e. Final Examination</td> <td>25%</td> </tr> <tr> <td colspan="4">Total</td> <td>100%</td> </tr> </tbody> </table>	No	CO	Assessment Object	Assessment Technique	Weight	1	CO2, CO3	Presentation	Observation	10%	2	CO4,CO5, CO6	a. Individual Assignment	Written test	10%	b. Group Assignment	10%	c. Quiz	20%	d. Mid-Term Examination	25%	e. Final Examination	25%	Total				100%
No	CO	Assessment Object	Assessment Technique	Weight																									
1	CO2, CO3	Presentation	Observation	10%																									
2	CO4,CO5, CO6	a. Individual Assignment	Written test	10%																									
		b. Group Assignment		10%																									
		c. Quiz		20%																									
		d. Mid-Term Examination		25%																									
		e. Final Examination		25%																									
Total				100%
