Creditpoints:	2
Prerequisites course(s):	Plane Geometry (MAT6203)
Course Outcomes	After taking this course the students have ability to: CO1. demonstrate collaborative attitude and respect the opinions of others in carrying out individual tasks and group assignments CO2. communicate ideas in solving mathematical problems

	<p>verbally and in writing</p> <p>CO3. master the concepts of space geometry in deductive axiomatic</p> <p>CO4. explore and prove the theorems of space geometry in deductive axiomatic</p> <p>CO5. solve the problems of space geometry in deductive axiomatic</p>																												
Content:	This course discusses elements of space and their relations, drawing geometrical objects, perpendicularity, angle, distance, polyhedrons, cylinder, cone, and sphere.																												
Study/exam achievements:	<p>CO1: Attitude assessment is carried out at each meeting by observation and / or self-assessment techniques using the assumption that basically every student has a good attitude. The student is given a value of very good or not good attitude if they show it significantly compared to other students in general. The result of attitude assessment is not a component of the final grades, but as one of the requirements to pass the course. Students will pass from this course if at least have a good attitude.</p> <p>The final mark will be weight as follow:</p> <table border="1"> <thead> <tr> <th>No</th> <th>CO</th> <th>Assessment Object</th> <th>Assessment Technique</th> <th>Weight</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>CO 2</td> <td>Presentation</td> <td>Observation</td> <td>10%</td> </tr> <tr> <td rowspan="5">2</td> <td rowspan="5">CO 3, CO 4, and CO 5</td> <td>a.
